Technical Application

The Honeywell ControlEdge HC900 Controller is an advanced loop and logic controller offering a modular design sized to satisfy the control and data acquisition needs of a wide range of process equipment. I/O Modules

The following I/O modules are available to create a custom control solution.

- 16 Channel Universal IO Module Galvanically isolated Input/Output to chassis (p.29)
- 8-point universal analog input modules: Galvanic isolation point to chassis inputs may be mixed on a module and may include multiple thermocouple types, RTDs, ohms, voltage or mill voltage types – all easily assigned using the Process Control Designer configuration tool.
